

Fahrenheit. A table for correction of volume of spirituous liquors to 60 degrees Fahrenheit, Table 7 of the "Gauging Manual," is available. See subpart E of part 30 of this chapter and § 30.67. Losses after receipt due to leakage, spillage, evaporation, or other causes not essential to the manufacturing process shall be accurately recorded in the manufacturer's permanent records at the time such losses are determined.

(e) *Tests of alcohol content.* At representative intervals, the manufacturer shall verify the alcohol content of nonbeverage products. The results of such tests shall be recorded.

§ 17.165 Receipt of raw ingredients.

For raw ingredients destined to be used in nonbeverage or intermediate products, the manufacturer shall record, for each shipment received—

- (a) The date of receipt;
- (b) The quantity received; and
- (c) The identity of the supplier.

§ 17.166 Disposition of nonbeverage products.

(a) *Shipments.* For each shipment of nonbeverage products, the manufacturer shall record—

- (1) The formula number of the product;
- (2) The date of shipment;
- (3) The quantity shipped; and
- (4) The identity of the consignee.

(b) *Other disposition.* For other dispositions of nonbeverage products, the manufacturer shall record—

- (1) The type of disposition;
- (2) The date of disposition; and
- (3) The quantity of each product so disposed of.

(c) *Exception.* The manufacturer need not keep the records required by paragraphs (a) and (b) of this section for any nonbeverage product which either contains less than 3 percent of distilled spirits by volume, or is sold by the producer directly to the consumer in retail quantities. However, when needed for protection of the revenue, the appropriate ATF officer may at any time require the keeping of these records upon giving at least five days' notice to the manufacturer.

§ 17.167 Inventories.

(a) *Distilled spirits.* The "on hand" figures reported in Part II of ATF Form 5154.2 shall be verified by physical inventories taken as of the end of each quarter in which nonbeverage products were manufactured for purposes of drawback. Spirits taxpaid at different effective tax rates shall be inventoried separately. The inventory record shall show the date inventory was taken, the person(s) by whom it was taken, subtotals for each product inventoried, and any gains or losses disclosed; and shall be retained with the manufacturer's records. The manufacturer shall explain in Part IV of the supporting data (Form 5154.2) any discrepancy between the amounts on hand as disclosed by physical inventory and the amounts indicated by the manufacturer's records. Any gain in eligible spirits disclosed by inventory requires an equivalent deduction from the claim with which the inventory is reported. Gains shall not be offset by known losses. If no claim is filed for a quarter (nor for any monthly period therein), then no physical inventory is required for that quarter.

(b) *Raw ingredients and nonbeverage products.* When necessary for ensuring compliance with regulations and protection of the revenue, the appropriate ATF officer may require a manufacturer to take physical inventories of finished nonbeverage products, and/or raw ingredients intended for use in the manufacture of nonbeverage or intermediate products. The results of such inventories shall be recorded in the manufacturer's records. Any discrepancy between the amounts on hand as disclosed by physical inventory and such amounts as indicated by the manufacturer's records shall also be recorded with an explanation of its cause.

§ 17.168 Recovered spirits.

(a) Each manufacturer intending to recover distilled spirits under the provisions of this part shall first notify the appropriate ATF officer. Any apparatus used to separate alcohol is subject to the registration requirements of 26 U.S.C. 5179 and subpart C of part 29 of this chapter. Recovery operations
